BRANDING GUIDELINES - FOR HAMZA - WEBSITE

PRAXIS STUDIO

Theory made real. Dark-first. Pixelated, with Helvetica Neue.

The vibe: pixel type + clean grotesque, black and bone.

Inside: 4 logo options for you to choose from, colour, type, graphics, website essentials.

Logo options - Hamza to choose

All four options, as supplied. Pick one and build with it everywhere.

Praxis Studio

Option 1 - Plain wordmark. Bold grotesque, normal x, no separate mark.

Option 2 - Pixel X starburst mark + wordmark with a diamond / bowtie x.

Option 3 - Pixel X starburst mark + wordmark with a normal x.

Praxis Studio

Option 4 - Wordmark with a 4-petal star / asterisk x. No separate mark.

Notes for whichever you pick: keep clear space around it, never retype it, and test it at 16px before using it as a favicon.

Colour

Inchworm

#B1FA63
RGB 177, 250, 99

Gunmetal

#243837
RGB 36, 56, 55

Orange

#FE7733
RGB 254, 119, 51

Pale Violet

#B2A1FF
RGB 178, 161, 255

Black

#000000

Bone

#DFE0D0

Bright Snow

#FFFFFF

American Silver

#D1D1D1

Use: Black + Bone do the work. Inchworm is the hero accent, with Gunmetal as the dark pairing. Orange and Pale Violet sparingly - max 1-2 accents per layout, never for body text.

Type

Helvetica Neue

Headlines, body, UI - the workhorse. AaBbCc 0123456789

Web fallback stack: Helvetica Neue, Helvetica, Arial, sans-serif.

PIXEL FACE

Labels, small display words, decorative moments only. Never body copy, never long text.

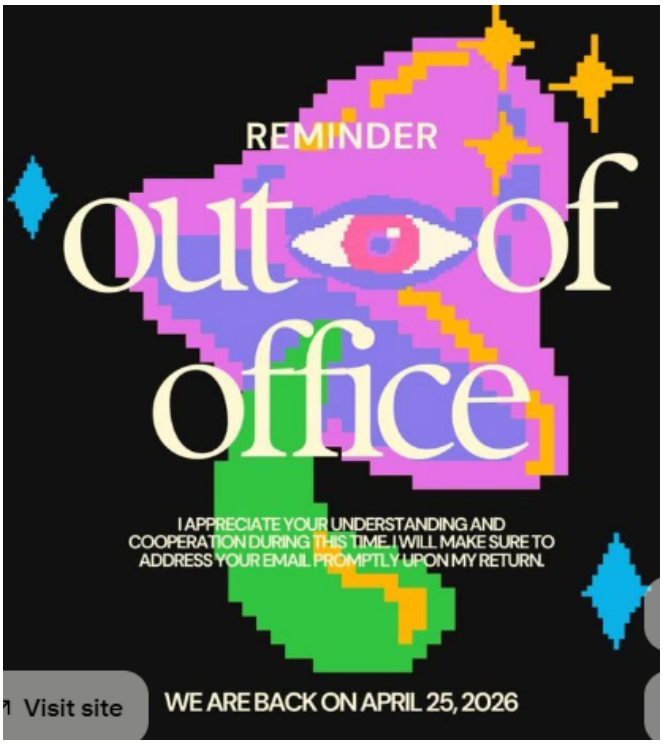

Serif, sometimes

Occasional big expressive headline only - as in the reference posters.

Reference: pixel + grotesque mixed on one page.

Pixel graphics

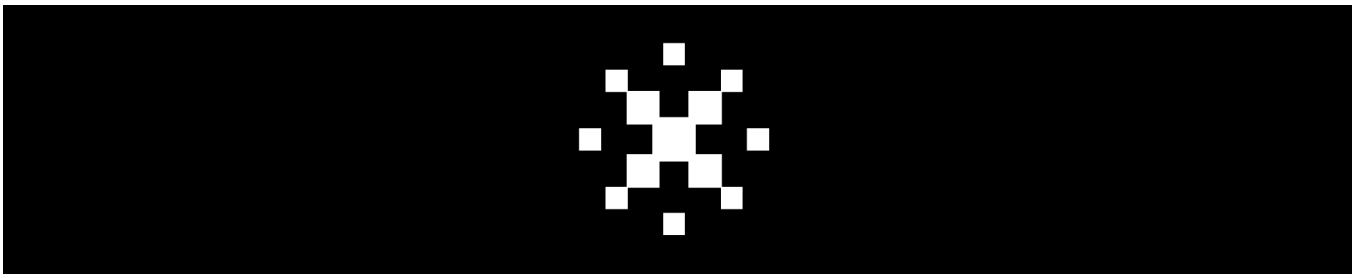

Colour pixel shapes on black, serif headline over them.

Photos in pixel-edged frames, pixel blocks, sparkles.

Rules: pixel elements are graphics, not text. Big or not at all. Sparkle / star motifs welcome. Keep photos natural - no heavy filters.

Website essentials

Build

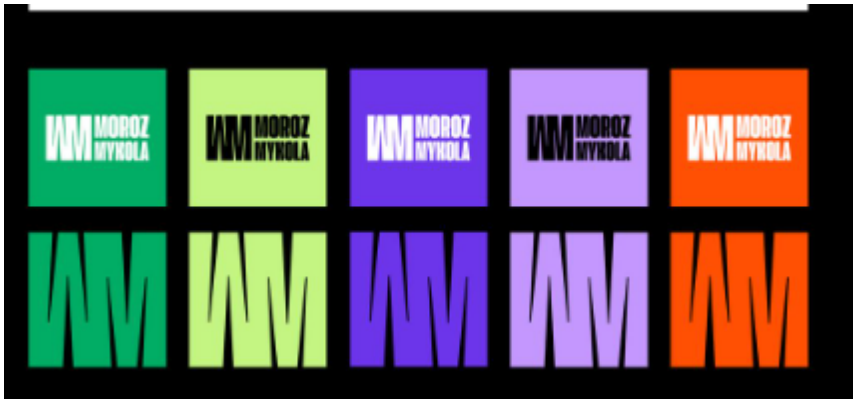

- Dark-first: black background, Bone text
- Header: chosen logo, reversed on black
- 12-column grid, 8px spacing
- Rounded cards, friendly card layouts
- Breakpoints: 1200 / 768 / 390
- Favicon + social avatar: test at 16px first
- Check contrast on every accent pairing

Colourways

One logo, several colourways - like the reference below. Use the palette backgrounds with the logo in a contrasting colour.

UI direction: rounded, card-based. (Its blue is not in the palette.)

Colourways reference - one logo, five colourways.

Important: any recoloured logo specimens are for guideline purposes only. Build with Laiba's final SVG exports, not recolours or PNG crops.

Voice, don'ts, checklist

Voice

Plain and direct. Short sentences.
Show the process, skip the agency filler.
Praxis only - keep it separate from ARSNL.

Don'ts

- Don't stretch, retype or re-space the logo.
- Don't put pixel type in body copy.
- Don't mix more than 2 accents in one layout.
- Don't use the name Khurafaat - it's Praxis now.

Still to confirm

- Hamza picks the logo (page 2).
- Laiba sends final SVG exports of the chosen logo.
- Exact pixel font file + web licence.
- Stacked lockup, if needed.

Hamza - that's everything. Build it dark, build it pixel, keep it simple.
